Website: - <https://social.technet.microsoft.com/Profile/harvansh%20singh>

Fill the name and provide the source location of Package. Click on Next.

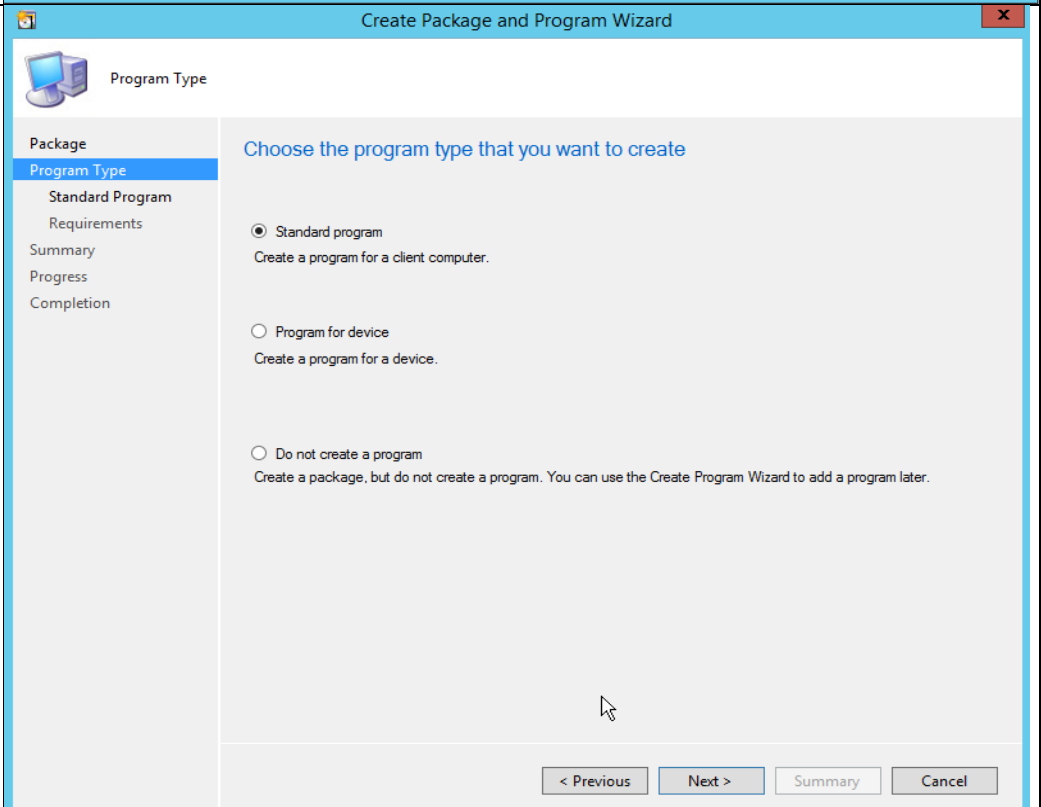

The screenshot shows the 'Create Package and Program Wizard' window, specifically the 'Package' step. The left sidebar contains a tree view with 'Package' selected, and other options like 'Program Type', 'Standard Program', 'Requirements', 'Summary', 'Progress', and 'Completion'. The main area is titled 'Specify information about this package' and contains the following fields and options:

- Name:** Mozilla Firefox Deployment
- Description:** (Empty text box)
- Manufacturer:** Mozilla
- Language:** English
- Version:** 50.0
- ☒ This package contains source files
- Source folder:** \\sccmlab\Software Package\Firefox 50.0
- Browse...** button

At the bottom right, there are four buttons: '< Previous', 'Next >', 'Summary', and 'Cancel'.

Select Standard Program and click on Next.

The screenshot shows the 'Create Package and Program Wizard' window, specifically the 'Program Type' step. The left sidebar contains a tree view with 'Program Type' selected, and other options like 'Package', 'Standard Program', 'Requirements', 'Summary', 'Progress', and 'Completion'. The main area is titled 'Choose the program type that you want to create' and contains the following options:

- ☒ Standard program
Create a program for a client computer.
- ☐ Program for device
Create a program for a device.
- ☐ Do not create a program
Create a package, but do not create a program. You can use the Create Program Wizard to add a program later.

At the bottom right, there are four buttons: '< Previous', 'Next >', 'Summary', and 'Cancel'.

Thanks,
Harvansh Singh

Fill the details as per requirement and click on Next.

The screenshot shows the 'Create Package and Program Wizard' window, specifically the 'Standard Program' step. The left sidebar contains a tree view with 'Package', 'Program Type', 'Standard Program' (selected), 'Requirements', 'Summary', 'Progress', and 'Completion'. The main area is titled 'Specify information about this standard program'. It contains several input fields: 'Name' (Mozilla Firefox), 'Command line' (Install.bat), 'Startup folder' (empty), 'Run' (Hidden), 'Program can run' (Whether or not a user is logged on), and 'Run mode' (Run with administrative rights). There are also checkboxes for 'Allow users to view and interact with the program installation' and 'Reconnect to distribution point at log on'. At the bottom, there are buttons for '< Previous', 'Next >', 'Summary', and 'Cancel'.

Select the OS type where you want to deploy the package. Click on Next.

The screenshot shows the 'Create Package and Program Wizard' window, specifically the 'Requirements' step. The left sidebar contains a tree view with 'Package', 'Program Type', 'Standard Program', 'Requirements' (selected), 'Summary', 'Progress', and 'Completion'. The main area is titled 'Specify the requirements for this standard program'. It contains checkboxes for 'Run another program first' and 'Always run this program first'. Below these is a section for 'Platform requirements' with two radio buttons: 'This program can run on any platform' (selected) and 'This program can run only on specified platforms'. The second option has a list of operating systems with checkboxes, including 'All Windows RT', 'All Windows RT 8.1', 'All Windows 10 (32-bit)', 'All Windows 10 (64-bit)', 'All Windows 7 (64-bit)', 'All Windows 8 (64-bit)', 'All Windows 8.1 (64-bit)', 'Windows Embedded 8 Industry (64-bit)', 'Windows Embedded 8 Standard (64-bit)', and 'Windows Embedded 8.1 Industry (64-bit)'. At the bottom, there are fields for 'Estimated disk space' (Unknown) and 'Maximum allowed run time (minutes)' (120). At the bottom right, there are buttons for '< Previous', 'Next >', 'Summary', and 'Cancel'.

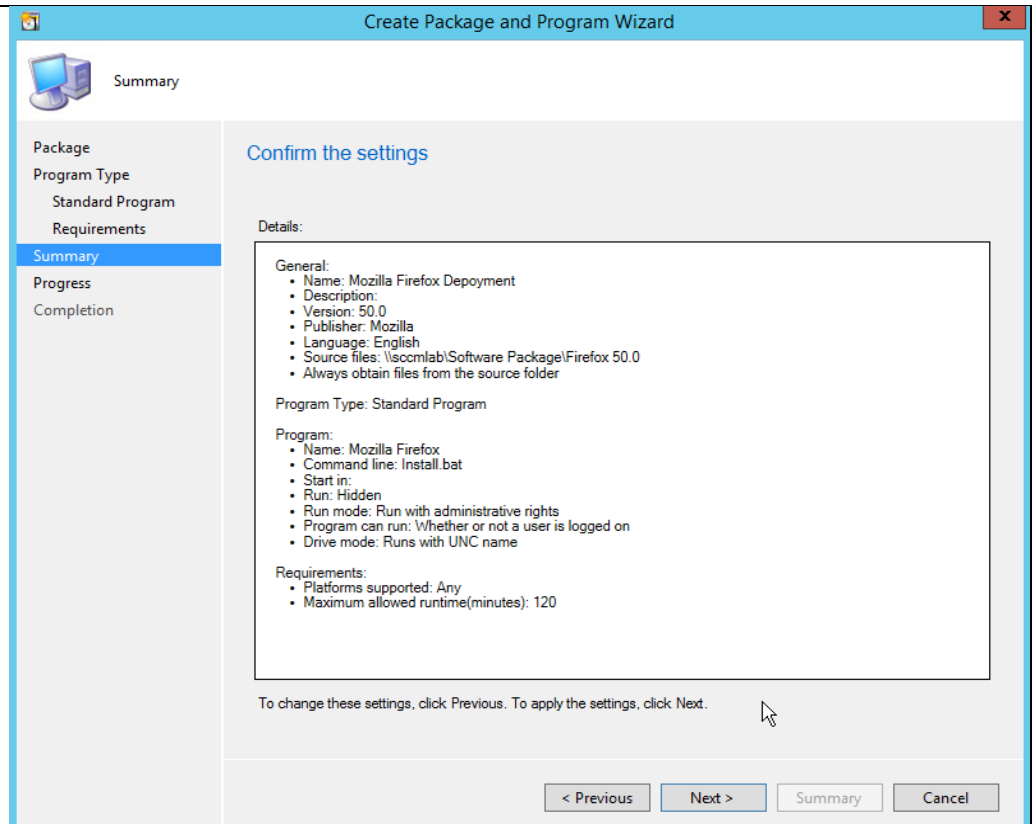

Thanks,
Harvansh Singh

Website: - <https://social.technet.microsoft.com/Profile/harvansh%20singh>

Select the collation where you want to deploy it. Click on Next.

The screenshot shows the 'Deploy Software Wizard' window with the 'General' tab selected. The left sidebar contains a tree view with 'General' highlighted. The main area is titled 'Specify general information for this deployment'. It includes fields for 'Software' (Mozilla Firefox Deployment (Mozilla Firefox)) and 'Collection' (Test Deployment), each with a 'Browse...' button. Below these are two unchecked checkboxes: 'Use default distribution point groups associated to this collection' and 'Automatically distribute content for dependencies'. A 'Comments (optional):' text area is also present. At the bottom are buttons for '< Previous', 'Next >', 'Summary', and 'Cancel'.

Click on Add button to select the D.P. and click on Next.

The screenshot shows the 'Deploy Software Wizard' window with the 'Content' tab selected. The left sidebar has 'Content' highlighted. The main area is titled 'Specify the content destination'. It features a table with columns 'Name' and 'Type' showing no items. Below this is a section for 'Additional distribution points, distribution point groups, and the distribution point groups that are currently associated with collections to distribute content to:'. This section includes a 'Filter...' input, a table with columns 'Name', 'Description', and 'Associations' (containing 'SCCMLAB.LAB.COM' and 'Distribution point'), and 'Add' and 'Remove' buttons. At the bottom are buttons for '< Previous', 'Next >', 'Summary', and 'Cancel'.

Thanks,
Harvansh Singh

Website: - <https://social.technet.microsoft.com/Profile/harvansh%20singh>

Select the Purpose Available or Required mode. Click on Next.

The screenshot shows the 'Deploy Software Wizard' window, specifically the 'Deployment Settings' tab. The left sidebar contains a list of tabs: General, Content, Deployment Settings (selected), Scheduling, User Experience, Distribution Points, Summary, Progress, and Completion. The main area is titled 'Specify settings to control how this software is deployed'. It features two dropdown menus: 'Action' set to 'Install' and 'Purpose' set to 'Available'. Below these is an unchecked checkbox labeled 'Require administrator approval if users request this application'. At the bottom right, there are four buttons: '< Previous', 'Next >', 'Summary', and 'Cancel'.

Scheduled the available and expire time then click on Next.

The screenshot shows the 'Deploy Software Wizard' window, specifically the 'Scheduling' tab. The left sidebar shows the same list of tabs as the previous screen, with 'Scheduling' now selected. The main area is titled 'Specify the schedule for this deployment'. It includes a descriptive paragraph: 'This program will be available as soon as it has been distributed to the content servers unless it is scheduled for a later time below. For required applications, specify the assignment schedule.' There are two main scheduling options, both with date and time pickers (set to 11/22/2016 at 2:52 AM) and a 'UTC' checkbox. The first option, 'Schedule when this deployment will become available:', is checked. The second option, 'Schedule when this deployment will expire:', is unchecked. Below these is an 'Assignment schedule:' section with 'New...', 'Edit...', and 'Delete' buttons, and a message box stating 'There are no items to show in this view.' At the bottom, there is a 'Rerun behavior:' dropdown set to 'Always rerun program'. The same four navigation buttons ('< Previous', 'Next >', 'Summary', 'Cancel') are at the bottom right.

Thanks,
Harvansh Singh

Select the Software installation and click on Next.

The screenshot shows the 'Deploy Software Wizard' window with the 'User Experience' tab selected. The left sidebar contains a list of steps: General, Content, Deployment Settings, Scheduling, User Experience (highlighted), Distribution Points, Summary, Progress, and Completion. The main area is titled 'Specify the user experience for the installation of this software on the selected devices'. It includes 'Notification settings' with a checked box for 'Allow users to run the program independently of assignments'. Below this, it states 'When the scheduled assignment time is reached, allow the following activities to be performed outside the maintenance window:' with checked boxes for 'Software installation' and 'System restart (if required to complete the installation)'. There is also a section for 'Write filter handling for Windows Embedded devices' with a checked box for 'Commit changes at deadline or during a maintenance window (requires restarts)'. At the bottom, there are buttons for '< Previous', 'Next >', 'Summary', and 'Cancel'.

Select Download content from Distribution Point and run locally. Click on Next.

The screenshot shows the 'Deploy Software Wizard' window with the 'Distribution Points' tab selected. The left sidebar contains a list of steps: General, Content, Deployment Settings, Scheduling, User Experience, Distribution Points (highlighted), Summary, Progress, and Completion. The main area is titled 'Specify how to run the content for this program according to the type of boundary the client is connected to'. It includes instructions to 'Select the deployment option to use when a client is connected within a fast (LAN) network boundary.' and a dropdown menu set to 'Download content from distribution point and run locally'. Below this, it states 'Select the deployment option to use when a client is within a slow or unreliable network boundary, or when the client uses a fallback source location for content.' with another dropdown menu also set to 'Download content from distribution point and run locally'. There is a checked box for 'Allow clients to share content with other clients on the same subnet' and a note explaining that this option allows clients to use Windows BranchCache. At the bottom, there are buttons for '< Previous', 'Next >', 'Summary', and 'Cancel'.

Website: - <https://social.technet.microsoft.com/Profile/harvansh%20singh>

Go to software Center and verify that Mozilla Firefox is on available mode.

Select the Mozilla Firefox and click on Install.

Note:- If you was selected as a Required mode then Package will install automatically.

The screenshot displays the Windows Software Center application window. The title bar reads "Software Center" with standard window controls. The top navigation bar includes tabs for "Available Software", "Installation Status", "Installed Software", and "Options". The "Available Software" tab is active. Below the navigation bar, there is a "SHOW" dropdown menu set to "All", a checkbox for "Show optional software" which is checked, and a search bar with the placeholder text "SEARCH". A link "Find additional applications from the Application Catalog" is visible. A table lists available applications with columns for NAME, TYPE, PUBLISHER, AVAILABLE AF..., and STATUS. The applications listed are Adobe Reader 11018 11018 - Adobe Read..., Java_jdk-7u79-windows-x64_jdk-7u79 - Ja..., and Mozilla Firefox 50.0 - Mozilla Firefox 50.0. The Mozilla Firefox entry is highlighted. Below the table, the details for "Mozilla Mozilla Firefox 50.0 - Mozilla Firefox 50.0" are shown. This section includes an "OVERVIEW" table with fields for Status (Available), Language (English), Version (50.0), and Date published (11/22/2016). It also includes a "REQUIREMENTS" section with fields for Restart required (No), Download size (44 MB), Estimated time (Not specified), and Total components (1). A description field is present but empty. An "INSTALL" button is located at the bottom right of the details section.

NAME	TYPE	PUBLISHER	AVAILABLE AF...	STATUS
Adobe Reader 11018 11018 - Adobe Read...	Application	Adobe	11/22/2016	Available
Java_jdk-7u79-windows-x64_jdk-7u79 - Ja...	Application	Java	11/22/2016	Available
Mozilla Firefox 50.0 - Mozilla Firefox 50.0	Application	Mozilla	11/22/2016	Available

OVERVIEW		REQUIREMENTS	DESCRIPTION
Status:	Available	Restart required:	No
